MND Drilling and Services a.s.
Velkomoravska 900/405
696 18 Luzice
Czech Republic

Dear Mr. Kopečný,

TDE Services would like to thank you for the high level services that MND Drilling and Services had provided during our drilling campaign in Serbia. Thanks to the performance of MND Drilling and Services, we successfully drilled 6 wells between December of 2012 and February of 2013.

Despite to the new and challenging environment and difficulties in the first 2 wells, both the Benteq 350t rig and the crew were fully capable to drill deep wells (cca. 4000m) wells and medium wells with complicated horizontal sections.

Beyond the crew and the rig's excellent performance, we would like to thank the management of MND Drilling and Services also for their excellent cooperation to manage even the unusual business questions.

We would be pleased to work with MDN Drilling and Services in the future.

Best Regards,

György Dávoti
