MND Drilling and Services a.s.
Velkomoravská 900/405
696 18 Lužice
Česká republika

Dear Mr Kopečný

BNK would like to thank you for the good work that MND has done for our Indiana Investments Sp z.o.o partnership during 2012 on our Miszewo T-1 and Gapowo B-1 wells using the Bentec 350 and most recently in 2014 on our Gapowo B-1a horizontal well using the Bentec 450. You should be aware BNK believes that the Gapowo B-1a was the deepest and longest lateral horizontal well drilled to date in Poland. The rig and crews met the numerous challenges on this well and adapted to using the oil based mud with no complaints from anyone. The challenges that we experienced on this well could not have been overcome without the excellent cooperation and help of the MND management and crews.

On all 3 wells, your rig and crews performed with a good attitude toward safety. So much so, that despite all the extreme cold weather and snow, there were no recordable accidents on site by MND or any of the service providers.

Please pass on my thanks to the crews for all the hard work.

Kind Regards

A handwritten signature in black ink, appearing to read "T. Junker", with a long horizontal stroke extending to the right.

Thomas Junker
Worldwide Drilling Manager
