Subject: Stripfing T1 Well - Appreciation Letter

Dear Mr. Kopečný,

On the occasion of demobilizing the Bentec 450t rig from Stripfing T1 well location, OMV management would like to thank MND D&S for their excellent performance & co-operation experienced during drilling the Stripfing T1 well.

We are very pleased with both the rig and the crew's performance which were very crucial in overcoming the unexpected technical challenges associated with drilling the deep HPHT exploration well Stripfing T1. The crew manning the rig is well trained and is continuously demonstrating high HSEQ awareness.

OMV management appreciates also the outstanding performance developed in optimizing the tripping speed which has been doubled in less than one month in safe and efficient manner.

We are looking forward to the opportunity to work with MND D&S again in the future.

Sincerely Yours,

OMV Group

Khaled Abdelaal
Senior Drilling Engineer
