HSEQ

Occupational Health and Safety Management System

The main building blocks constituting the HSEQ integrated management system are health and safety at work.

The company's general principles are as follows:

- occupational safety and health and environmental protection are just as important as all other business activities and, as such, form an integral part of the management's responsibilities,
 - the objective is to achieve an accident-free work environment at all of our drilling and workover sites, as well as at all other workplaces operated by the company,
 - each individual is responsible for his/her own safety and the safety of his/her co-workers,
 - proactive approach to safety issues at all levels of management.
- The OHSAS Certificate, first awarded in 2009, has been successfully renewed every year since then.

Environmental Protection Management System

The features of the system of environmental protection management adopted in MND Drilling & Services include:

- strict adherence to all legal requirements imposed by the Czech Republic and any other country we operate in,
- strong emphasis on the prevention of environmental damage (responsible waste management, conscientious handling of chemicals),
- investment in eco-friendly projects.

The company has been a holder of the ISO 14001 Certificate since 2003.

Quality Management System

The main building blocks of quality management are:

- all maintenance work and services are performed to the quality standards and within deadlines requested by our clients,
- the company's organizational structure is clearly defined and each employee holds a specific position within the company hierarchy, fully aware of his/her duties and scope of authority,
- all work is performed only by qualified personnel with the required experience.

The company has been a holder of the ISO 9001 Certificate since 2001.
